

Chiranjib Saha

Graduate Research Assistant
Wireless@Virginia Tech
Department of Electrical and Computer Engineering
Virginia Tech, Blacksburg, USA

OBJECTIVE

Seeking internship position for Summer 2018 in 4G/5G wireless system engineering team.

CONTACT INFORMATION

470 Durham Hall, Virginia Tech
Blacksburg, Virginia, USA

RESEARCH INTERESTS

Wireless communications; 5G networks; Heterogeneous cellular networks (HetNEts); LTE/LTE-A, WiFi; Internet of Things (IoT); Device-to-device (D2D) communications; Integrated access and backhaul design; Spectrum sharing; Machine learning; Signal processing; Stochastic geometry.

EDUCATION

- Virginia Tech., USA.** Third year Ph.D. in Electrical and Computer Engineering **2015-Present**
- Advisor: Dr. Harpreet S. Dhillon
 - Current Research Project: Joint Backhaul and Radio Access Design for Heterogeneous Wireless Networks
 - Current GPA: 3.85
- Jadavpur University, India** B.E. in Electronics and Telecommunication Engineering. **2011-2015**
- Final year Project Topic: Gesture driven control of an Arduino based robot using Kinect
 - Advisor: Dr. Amit Konar
 - CGPA: 9.22

PHD RESEARCH EXPERIENCE

- **Integrated access and backhaul (IAB): design challenges and insights** **May 2017-Present**
 - Proposed new stochastic geometry-based model for mmWave IAB-enabled HetNet
 - Load modeling, coverage and data-rate analysis, studying resource partition strategies in IAB.
- **3GPP-inspired stochastic geometry models for HetNets** **Sep. 2015-May 2017**
 - Proposed new stochastic geometry-based models closely resembling 3GPP HetNet models, coverage analysis and model comparisons.
- **Performance analysis of D2D-enabled cellular networks** **Jan. 2016-May 2016**
 - Proposed new spatial models for D2D communication in user hotspots, analyzed downlink coverage and rate trends.

JOURNAL PUBLICATIONS

- [J6] **C. Saha**, M. Afshang, H. S. Dhillon, “3GPP-inspired HetNet model using Poisson cluster process: sum-product functionals and downlink coverage”, in *IEEE Trans. Commun.*, to appear.

GRADUATE LEVEL PROJECTS

- **Fitting point processes to cellular network topology** **Fall 2016**
 - Fitted point processes from Gibbs process family to analyze the location patterns of base stations in different urban regions of UK for four major telecom operators.
- **Software implementation of error control encoders and decoders** **Spring 2017**
 - C++ implementation of BCH encoders and Berlekamp-Massey algorithm, convolutional encoders and Viterbi decoder, LDPC codes.
- **Software design of digital transmitter and receiver** **Spring 2016**
 - MATLAB implementation of fundamental building blocks of a digital trans-receiver, e.g. modulation-coding schemes, pulse-shaping, OFDM and BER analysis for AWGN and fading channels.
- **Comparative study and analysis of MIMO techniques** **Fall 2015**
 - Coded SU-MIMO receivers based on pre-coding, zero-forcing (ZF), successive interference cancellation (SIC) algorithms to compare performance of multiplexing schemes.
 - Analyzed antenna diversity techniques and DOA algorithms such as MUSIC, ESPRIT.
- **OFDM Channel Estimation and Receiver Algorithms** **Fall 2015**
 - Performed OFDM channel estimation using LS and MMSE approaches and implemented receiver algorithms including ZF, MMSE and SIC.
 - Simulated OFDM in frequency selective channels to capture performance.

UNDERGRAD RESEARCH EXPERIENCE

- **Summer Intern** **May 2014-Jul. 2014**

National University of Singapore
Project: Multi-objective optimization algorithms for application in day-ahead thermal scheduling
- **Intern** **Dec. 2013-Jan. 2014**

Indian Institute of Technology, Delhi
Project: Application of evolutionary computation and perceptron networks in biometric systems
- **Undergraduate Research** **Dec. 2012-May 2014**

Indian Statistical Institute, Kolkata Project: Designing dynamic constraint optimization algorithms

GRADUATE COURSES UNDERTAKEN

Multichannel communications, Stochastic signals and systems, Information theory, Advanced digital communication, Measure and probability, Spatial statistics, Error control coding.

AWARDS

Wireless@VT Fellowship, 2015.

COMPUTER SKILLS

- **Programming Languages:** C, C++, R, MATLAB, Mathematica
- **Scripting Languages:** HTML5, L^AT_EX

TEACHING EXPERIENCE

Course Instructor of Electronic Circuits Laboratory in Virginia Tech Fall 2015-Spring-2016.
